

Kitty

2021

TAG: K K X 1 9 9

Hawksbill sea turtle

FIRST SPOTTED

18 August

@12:23 am

When a new turtle like Kitty shows up for the first time, she will get a metal flipper tag and an internal tag (microchip). This way we can identify her easily each time she comes back to nest and we can track her nesting history over many years.

the

HISTORY

Turtle #49

of Kitty

at Sandy Point since 2021!

Kitty was a new nesting hawksbill turtle this year!

Size:

85.3 cm

About Kitty

We saw Kitty just once this season at Sandy Point. She was found nesting on 18 August at the point of the refuge under a sea grape in the forest. She is a small and clean turtle, no barnacles for Kitty! We hope to see Kitty return in a few years!

Average # Eggs

124
