

Ptolemy

TAG: FFG285
Hawksbill sea turtle

FIRST SEEN

19 September

@8:39 PM

SIZE:

73.3 cm

Ptolemy was a new turtle in 2025. She was given metal flipper tags and a microchip, as well as a satellite tag. We tracked her to foraging grounds near Cabo Rojo, Puerto Rico. We will be able to identify her easily each time she comes back to nest at Sandy Point and we can track her nesting history over many years.

Adopted by: Sara S in 2025.
